

Blockchain mania reaches Hector the Regulator's boss

dcmf.co.uk/hector

The boss embraces technology.

I went to a DNO-to-DSO presentation of a peer-to-peer blockchain flexibility platform.

You must simplify regulation to help them, Hector.

There are laws against abusing a DNO monopoly to gain market power in other areas.

I need time to study competition risks of regulatory help for a platform.

I am pretty sure that these laws don't apply to blockchain.

These guys are so good, they don't even have to comply with the laws of physics.
